	STUDY GUIDE	
PROGRAM	BDS	
COURSE TITLE	Physiology	
ACADEMIC YEAR	1 st Year, 2023	
INTRODUCTION	Physiology is one of the essential basic science disciplines which dental	
	students across Pakistan and outside study This discipline helps students	
	learn about the functions of various systems of the body so that they are	
	better able to understand the malfunctions at a later stage.	
OUTCOMES	By the end of this course, students will be able to describe the functions of	
	various body systems	
DEPARTMENT	Department Physiology	
INVOLVED		
LECTURE	By the end of the course, the students will be able to:	
OBJECTIVES	FOUNDATION	
	Define the following terminologies:	
	- osmotic pressure	
	- tonicity	
	- bulk transport	
	- phagocytosis	
	- pinocytosis	
	Discuss the importance of physiology in modern medicine	
	Discuss the basic life processes and survival needs of the body	
	Explain the principle of homeostasis as a central theme of	
	physiology	
	 Discuss the negative and positive feedback systems 	
	Describe the body fluid compartments	
	Discuss the composition of body fluid compartments	
	Discuss the importance of cell as the basic unit of life	
	Describe the composition of cell membrane	
	Explain the structures and functions of cell and all its components	
	Discuss the types of membrane transport	

•	Compare the various types of solutions with regard to their tonicity
NERVE	AND MUSCLE
•	Define the following terminologies:
	- motor unit
	- motor unit recruitment
	- simple muscle twitch
	- summation
	- tetanization
	- fatigue
	- synapse
	- Nernst potential
	- power stroke
•	List the sources of energy for muscle contraction and types of
	smooth muscles
•	Discuss the distribution of ions across the plasma
•	Discuss the resting potential and its importance
•	Write the Nernst equation
•	Describe the structures and functions of different parts of a neuron
•	Discuss the electrical and chemical synapses
•	Describe the initiation of action potential
•	Discuss the phases of action potential and its propagation in
	myelinated and non-myelinated nerve fibers
•	Explain the graph of action potential
•	Describe the structure and functional characteristics of skeletal
	muscle
•	Explain the role of actin and myosin in skeletal muscle contraction
•	Discuss the parts of neuromuscular junction (NMJ)
•	Discuss the steps of impulse transmission through neuromuscular
	junction
•	Discuss the physiological basis of disorders of NMJ

•	Discuss mechanism of skeletal muscle contraction and relaxation at
	molecular level
•	Describe the role of ATP in muscle contraction
•	Explain the phenomenon of excitation contraction coupling in
	skeletal muscle
•	Describe structure and function of sarcoplasmic reticulum and T-
	tubules
•	Differentiate between isotonic and isometric muscle contraction
•	Discuss the basis of muscle fatigue
•	Differentiate among the different types of muscle fibers on the basis
	of their structures and functions
•	Discuss the membrane and action potentials in smooth muscles
•	Discuss the contractile mechanism of smooth muscles
•	Discuss the nervous and hormonal controls of smooth muscle
	contraction
•	Compare smooth and skeletal muscles with regard to their
	structures and functions
BLOO	<u>D</u>
•	Define hemostasis, anemia and polycythemia
•	List the sites of erythropoiesis
•	List the contents and functions of platelets
•	Classify anemia on the basis of cell morphology and etiology
•	Describe the functions of blood and those of its components
•	Describe the structure and functions of erythrocytes
•	Draw a flow chart of RBCs production
•	Discuss the humoral, maturational and nutritional factors affecting
	erythropoiesis
•	Discuss the formation, functions, fate and pathologies of
	hemoglobin
•	Discuss various types of polycythemia

	Explain the following:
	- ABO blood types
	 Rh blood types
	 Mismatched blood transfusion hazards
	- Erythroblastosisfetalis
	 Discuss the events of hemostasis
	Discuss the intrinsic and extrinsic coagulation pathways
	Discuss the fibrinolytic mechanism
	Describe the factors that prevent clotting in normal vascular system
	 Discuss the conditions that cause uncontrolled bleeding
	Discuss leukopoeisis and inflammation
	 Differentiate among the various types of white blood cells on the
	basis of their functions and physical characteristics
	 Describe immunity and its types
	 Discuss types and functions of T-lymphocytes
	 Discuss the structures of antigens and antibodies
	 Discuss the complement system
	Describe hypersensitivity reactions
CA	RDIOVASCULAR SYSTEM
	Discuss the physiology of cardiac muscle
	Discuss the importance of intercalated discs in cardiac muscle
	function
	• Compare various types of muscles with regard to their structure and
	functions
	Discuss the structure of cardiac muscle with regard to its function
	 Discuss the cardiac action potential
	 Compare the skeletal muscle and heart on the basis of their action
	potentials
	Discuss the electrical conduction system of the heart and the role of SA node
	SA node

•	Draw electrocardiogram (ECG) of a normally functioning heart
•	Discuss the following:
	- Myocardial events
	- 12 ECG leads
	- Tachycardia
	- Bradycardia
	- Myocardial infarction/ischemia
	- Atrial flutter
	- Atrial fibrillation
	- Heart blocks
•	Define the cardiac vector and axis of heart
•	Discuss the cardiac cycle
•	Discuss cardiac output and Frank-Starling Law
•	Discuss the nervous and chemical factors that alter heart rate,
	stroke volume and cardiac output
•	Discuss the physical characteristics of circulation
•	Discuss the interrelationships of pressure, blood flow and resistance
•	Discuss vascular distensibility and functions of the arterial and
	venous systems
•	Discuss the systolic, diastolic, mean arterial and pulse pressures
•	Discuss short-, intermediate- and long-term regulations of blood pressure
•	Discuss the renin angiotensin aldosterone system
•	Describe the local control of blood flow
•	Discuss the humoral control of circulation
•	Explain the capillary system
•	Discuss the vasomotion and fluid-filtration across capillaries
•	Describe the physiological causes of shock

 ESPIRATORY SYSTEM List the structures that make up the respiratory system in correct order Discuss the functions of each structure of the respiratory system Differentiate between the conducting and respiratory zones of respiratory passages Describe the roles of muscles of respiration in breathing Discuss the pressure gradients Discuss the significance of dead space Discuss the sloyle's Law Describe lung volumes and capacities in adult male Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss factors affecting exchange through the respiratory membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the role of the four main groups of nuclei that control breathing Discuss the role of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 		
 order Discuss the functions of each structure of the respiratory system Differentiate between the conducting and respiratory zones of respiratory passages Describe the roles of muscles of respiration in breathing Discuss the pressure gradients Discuss the significance of dead space Discuss the Boyle's Law Describe lung volumes and capacities in adult male Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the transport of oxygen and carbon dioxide in blood Discuss the role of the moglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	RESPI	<u>RATORY SYSTEM</u>
 Discuss the functions of each structure of the respiratory system Differentiate between the conducting and respiratory zones of respiratory passages Describe the roles of muscles of respiration in breathing Discuss the pressure gradients Discuss the significance of dead space Discuss the Boyle's Law Describe lung volumes and capacities in adult male Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of partial pressure in gas transport by blood Describe the factors affecting release and binding of oxygen to hemoglobin Discuss the role of the four main groups of nuclei that control breathing Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors in the regulation of respiration 	•	List the structures that make up the respiratory system in correct
 Differentiate between the conducting and respiratory zones of respiratory passages Describe the roles of muscles of respiration in breathing Discuss the pressure gradients Discuss the significance of dead space Discuss the Boyle's Law Describe lung volumes and capacities in adult male Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the role of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 		order
 respiratory passages Describe the roles of muscles of respiration in breathing Discuss the pressure gradients Discuss the significance of dead space Discuss the Boyle's Law Describe lung volumes and capacities in adult male Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the role of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	Discuss the functions of each structure of the respiratory system
 Describe the roles of muscles of respiration in breathing Discuss the pressure gradients Discuss the significance of dead space Discuss the Boyle's Law Describe lung volumes and capacities in adult male Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of partial pressure in gas transport by blood Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the factors that can influence rate and depth of breathing Discuss the factors of chemoreceptors in the regulation of respiration 	•	Differentiate between the conducting and respiratory zones of
 Discuss the pressure gradients Discuss the significance of dead space Discuss the Boyle's Law Describe lung volumes and capacities in adult male Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss factors affecting exchange through the respiratory membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the factors that can influence rate and depth of breathing Discuss the factors of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 		respiratory passages
 Discuss the significance of dead space Discuss the Boyle's Law Describe lung volumes and capacities in adult male Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss factors affecting exchange through the respiratory membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the factors that can influence rate and depth of breathing Describe locations of chemoreceptors in the regulation of respiration 	•	Describe the roles of muscles of respiration in breathing
 Discuss the Boyle's Law Describe lung volumes and capacities in adult male Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss factors affecting exchange through the respiratory membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the factors that can influence rate and depth of breathing Discuss the factors of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	Discuss the pressure gradients
 Describe lung volumes and capacities in adult male Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss factors affecting exchange through the respiratory membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	Discuss the significance of dead space
 Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss factors affecting exchange through the respiratory membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the factors that can influence rate and depth of breathing Discuss the factors of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	Discuss the Boyle's Law
 Discuss the relationship of partial pressure with that of a gas mixture Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss factors affecting exchange through the respiratory membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the factors that can influence rate and depth of breathing Discuss the factors of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	Describe lung volumes and capacities in adult male
 Describe partial pressures of oxygen and carbon dioxide in venous and arterial blood, and alveolar air and cells Discuss factors affecting exchange through the respiratory membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors in the regulation of respiration 	•	Discuss the relationship of partial pressure with that of a gas mixture
 and arterial blood, and alveolar air and cells Discuss factors affecting exchange through the respiratory membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	
 Discuss factors affecting exchange through the respiratory membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 		
 membrane Compare inspired and alveolar air with regard to their composition Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	
 Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 		
 Discuss the role of partial pressure in gas transport by blood Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	Compare inspired and alveolar air with regard to their composition
 Describe the transport of oxygen and carbon dioxide in blood Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	
 Discuss the role of hemoglobin in oxygen transport Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	
 Describe the factors affecting release and binding of oxygen to hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	
 hemoglobin Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	
 Discuss Bohr's and Haldane effects Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 		
 Interpret the oxygen hemoglobin dissociation curve graph Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	-
 Describe the role of the four main groups of nuclei that control breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 		
 breathing Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 	•	
 Discuss the factors that can influence rate and depth of breathing Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 		
 Describe locations of chemoreceptors that monitor blood pH and gas concentrations Discuss the role of chemoreceptors in the regulation of respiration 		-
gas concentrationsDiscuss the role of chemoreceptors in the regulation of respiration		
 Discuss the role of chemoreceptors in the regulation of respiration 		
	_	
Discuss the causes of the following respiratory alsoraers/conditions:	•	
	•	Discuss the causes of the following respiratory also ders/conditions:

	- Emphysema
	- Bronchitis
	- Asthma
	- Pneumonia
	- Pulmonary edema
	- Hypoxia
N	JERVOUS SYSTEM
	List the different types of sensory pathways
	 Describe the basic organization of the nervous system
	• Discuss the generation of action potential and transmission of nerve
	signal
	Discuss synapse and its properties
	Discuss transmission of electrical signals between neurons
	Describe the general characteristics of receptors
	Classify receptors according to location and stimulus type
	Discuss receptor potential
	Discuss the transduction of sensory stimuli into nerve impulses
	• Discuss the transmission of sensory information into CNS (DCML and
	anterolateral)
	Discuss the various types of pain and pain receptors
	Discuss dual pathways for transmission of pain signals into CNS
	Discuss analgesia system in the brain and spinal cord
	Describe the brain opioids system
	• Discuss the organization of the spinal cord for motor functions
	Describe the role of muscle spindles and golgi tendon organs in
	muscle control
	Discuss cord reflexes
	Describe the pathway of pyramidal efferent tracts
	Compare pyramidal and extra pyramidal tracts with regard to their
	origin, termination and function

	Discuss the role of vestibular apparatus in monitoring equilibrium
•	Describe the role of Auditory Pathway in hearing
•	Discuss conductive and perceptive deafness
•	Describe the role of ossicles in the process of hearing
•	Discuss the physiological anatomy of ear
•	Discuss the visual pathway and associated lesions
•	Discuss the photochemistry of vision and image formation
•	Discuss the structure of retina and the fluid system of the eye
•	Explain the accommodation reflex
	refraction and their corrections
•	Mention the refractory surfaces of eye and the various errors of
•	Describe the physiological functions of each part of the eye
<u>SPEC</u>	IAL SENSES
	sympathetic nervous system
•	Discuss the value of adrenal medullae in the function of the
	substances
	preganglionic fibers, location of ganglia and neurotransmitter
•	Compare the divisions of the ANS with regard to the origin of
	parasympathetic nervous system and adrenal medulla
•	Discuss the structures and functions of sympathetic,
•	Discuss the general organization and activation of ANS
•	Discuss the components of the limbic system and their functions
	basal ganglia
•	Discuss the structure, functions, pathways and related disorders of
•	Describe various cerebellar disorders
	cerebellum
•	Discuss the structure, functions, input and output connections of
	oblongata

•	Discuss the various types of taste sensations and their perceptions
	on the tongue
•	Describe location and activation of taste buds
•	Describe the gustatory pathway
•	Describe the location and activation of the olfactory receptors
•	Discuss the primary sensations of smell
•	Describe the olfactory pathway
•	Define the anosmia, hyposmia and dysosmia
END	<u>DCRINE SYSTEM</u>
•	List the major endocrine glands and their locations
•	Classify hormones
•	Discuss the secretion, transport, clearance and mechanisms of
	action of various hormones
•	Describe the hormone receptors and their activation
•	Differentiate between endocrine and exocrine glands
•	Describe the structural and functional relationships of the
	hypothalamus-pituitary unit
•	Discuss the control, sites of action and functions of the
	adenohypophysis hormones
•	Discuss the effects of hypo- and hyper-secretions of
	adenohypophysis hormones
•	Compare the functions of the neurohypophysis with that of the
	hypothalamus
•	Discuss the synthesis, secretions and effects of anterior and posterio
	pituitary hormones
•	Describe the formation, secretion, functions and regulation of
	thyroid hormones
•	, Discuss disorders of thyroid hormones
•	Discuss the mode of action of insulin release

•	Discuss the functions of insulin, glucagon, somatostatin and
	pancreatic polypeptide
•	List the hormones that regulate the calcium and phosphate
	homeostasis
•	Discuss the functions of parathyroid hormone, vitamin D and
	calcitonin Describe hypo- and hypercalcemia
•	Describe the sites of formation, functions and control of secretion of
	mineralocorticoids and glucocorticoids
•	Discuss Cushing syndrome and Cushing and Addison's Diseases
DIGES	STIVE SYSTEM
•	Describe the structural and functional organizations of the digestive
	system
•	Discuss the physiological anatomy of the gastrointestinal tract (GIT)
•	Discuss the characteristic features of the smooth muscles of the GIT
•	Discuss the neural and hormonal control of the GIT (Enteric Nervous
	System)
	Describe the role of interstitial cells of Cajal in generation of basic
•	electrical rhythm (BER) of the GIT
•	Describe the types of GIT reflexes
•	Relate the role of interstitial cells of Cajal with smooth muscle
	contractile activity
•	Compare the effects of parasympathetic and sympathetic nervous
	activity in modulating GI activity
•	Describe the composition and functions of saliva
•	List the factors that increase salivary secretion
•	Discuss the nervous regulation of salivary secretion
•	Discuss the chewing and swallowing reflexes
•	Describe the functions of lower esophageal sphincter
•	Discuss the mechanisms that prevent food from entering the nasal
	cavity and larynx during swallowing

•	List the functions of stomach
•	Describe the components of gastric juice and their functions
•	Discuss the phases of gastric secretory activity, gastric emptying
	and its regulation
•	Describe the types of movement in small intestine
•	Discuss the inhibition of motility and secretion in the stomach
•	Discuss peristaltic rush and migrating motor complex
•	List structures that increase the absorptive surface area of the small
	intestine
•	Differentiate between segmentation and the migrating motor
	complex of the small intestine
•	Discuss the factors affecting the motility and secretion of food in the
	stomach
•	Discuss the glands of small intestine with regard to their secretions
	and functions
•	Describe the functions of each enzyme of the intestinal brush
	border
•	Describe the absorption of each type of nutrients in the small
	intestine
•	Discuss the composition, formation, conduction and functions of
	bile and bile salts
•	Describe the functions and emptying of gallbladder
•	Describe the composition and functions of pancreatic secretion
•	Explain the phases of pancreatic secretion
•	Discuss the role of hormones in regulating pancreatic secretion
•	Describe the structure, functions and major types of movements of
	large intestine
•	Discus the defecation reflex
•	Discuss functions of internal and external anal sphincters
•	Discuss the secretion and role of the following GIT hormones:
	- Cholecystokinin

	- Secretin
	- GIP
	- Gastrin
	- Gastrin Releasing Peptide
	- Pancreatic Polypeptide
	- Somatostatin
	- Vasoactive Intestinal Polypeptide
	- Motilin
URINA	<u>RY SYSTEM</u>
•	Discuss the functional anatomy of kidney
•	Define nephron and its types
•	Describe various parts of a nephron
•	Discuss the functions of kidney
•	Define GFR
•	State the normal range of GFR
•	Describe the glomerular filtration membrane and its function
•	Discuss the forces that promote and oppose glomerular filtration
•	Calculate net filtration pressure
•	Discuss the significance of auto-regulation of GFR
•	Describe the regulation of glomerular filtration by hormones and the
	nervous system
•	Discuss the passive and active mechanisms of transport for tubular
	reabsorption
•	Discuss the reabsorption of fluid by peritubular capillaries
•	Discuss tubular reabsorption and regulation along different parts of
	a nephron
•	Define tubular load and Tubular transport maximum (Tm)
•	Discuss the tubular secretion processes in different parts of a
	nephron
•	Discuss the osmotic gradient
•	Discuss the counter current mechanism

•	Discuss the renal mechanisms for excreting diluted urine
•	Discuss the roles of anti-diuretic hormone and osmoreceptors
•	Discuss the role of bladder in accommodating a wide range of
	urine volume
•	Describe the neural reflex pathway that regulates emptying of
	bladder
•	Discuss the effect of following hormones on kidney:
	- ADH
	- Aldosterone
	- Angiotensin II
	- ANP
•	- PTH

PRACTICALS	By the end of the course in Physiology, students will be able to perform the	
	following practicals:	
	Foundation	
	i. Osmotic Fragility	
	Blood	
	 i. Drawing Blood and blood Sampling, using a Microscope ii. Hemoglobin Estimation, iii. ESR, iv. Preparation of blood smear, DLC, v. Neubauer's Chamber vi. RBC Count vii. PCV viii. Clotting time ix. Bleeding Time x. Blood Grouping 	
	Locomotor System	
	i. Using a Power labii. Interpretation of Simple Muscle Twitch, Summation, Fatigue,	
	Tetanization	
	CVS	
	 i. Arterial pulse examination ii. ECG iii. Heart Sound iv. Blood Pressure v. Refractory period 	
	Respiratory System	
	i. Lung volume and Capacities,ii. Spirometry	
	Neurosciences	
	 i. Superficial Reflexes ii. Deep Reflexes iii. Cerebellar function test iv. Cranial nerve Examination v. Body Temperature 	
	Special senses	
	i. Visual Acuity,ii. Perimetryiii. Tuning fork test	

	iv. Taste and smell
INTERNAL	10% (Pre-professional Examination, Midterm Examination, Assignments and
ASSESSMENT	Class Presentations)
ANNUAL	90% (MCQS, OSPE)
EXAMINATION	
COURSE	This course will be evaluated as per JSMU & HEC policies
EVALUATION
