

	STUDY GUIDE
PROGRAM	MBBS
MODULE TITLE	Foundation Module- II
ACADEMIC YEAR	Third Year - 2025
INTRODUCTION	This module has been designed to introduce students to basic
	concepts essential for understanding a number of issues related to
	diseases process, their prevention and treatment. It is hoped that
	learners will be able to apply these key concepts in future, system-
	based modules to understand the diseases processes and their
	management.
RATIONALE	In the 2nd spiral, before students understand the complex issues
	related to organ systems, it becomes necessary for them to have
	clear concepts underlying them. This module is designed so that it
	proceeds from simple to more complex basic issues. Concepts dealt
	with in this module will be
	Revisited in many other modules in the future.
OUTCOMES	By the end of the module, students should be able to describe main
	concepts from each of the disciplines taught
DEPARTMENTS	1. Biochemistry,
INVOLVED	2. Community Medicine,
	3. Forensic Medicine & Toxicology,
	4. Pathology & Microbiology,
	5. Pharmacology
MODULE	By the end of the module, students will be able to:
OBJECTIVES	
LECTURES	1. Regulation of gene expression

	JINNAH SINDH MEDICAL UNIVERSITY
BIOCHEMISTRY	Define the term gene expression
	Explain the mechanism of gene expression in prokaryotes and
	eukaryotes
	Justify the need for gene expression
	2. DNA isolation
	Define DNA Isolation
	Describe the different methods of isolation of DNA
	Explain the uses of DNA isolation
	3. Recombinant DNA technology
	Define the term Recombinant DNA technology
	Describe the different types of Recombinant technologies and
	their uses
	Explain the significance of Recombinant technology
	4. Hybridization and blotting techniques
	Define the terms related to Hybridization and blotting
	techniques
	Explain the types of hybridization and blotting techniques and
	their methods (Flow chart)
	Describe the uses and significance of each method
COMMUNITY	1. Introduction to public health
MEDICINE	Define common terminologies used in Community Medicine
	Discuss Comprehensive Health Care
	Briefly describe historical development of Public Health
	Discuss development of public health in Pakistan
	Explain Social Action Program
	Discuss major health problems in Pakistan
	2. Determinants of Disease & iceberg
	Explain determinants of disease

JINNAH SINDH MEDICAL UNIVERSITY     • Explain determinants of Health
Discuss iceberg phenomenon
3. Natural history of disease & Levels of prevention
Discuss the phenomenon of natural history of disease
Explain different levels of prevention
4. Introduction to Epidemiology
Describe Epidemiology
Explain theories of disease causation
5. International organizations
List regional offices of World Health Organization (WHO)
Discuss functions of WHO & UNICEF
<ul> <li>Discuss UNICEF's GOBI-FFF program</li> </ul>
6. Health Care System
Describe health system
Define district health system
<ul> <li>Describe the role of district management team</li> </ul>
<ul> <li>Explain health systems development</li> </ul>
• Discuss the situation analysis by studying health indicators and
health needs.
<ul> <li>Enumerate health services and resources</li> </ul>
• Describe major health problems of rural and urban areas of
Pakistan
Explain multi-sectoral interaction and partnership
Discuss the following:
i. Health system problems
ii. Public health engineering
iii. Financial and organizational problems
iv. Problems of health planning, evaluation and research
v. Primary aims of Integrated Health
1

	JINNAH SINDH MEDICAL UNIVERSITY
	7. Primary Health Care (PHC)
	Describe Primary Health Care
	<ul> <li>Explain essential components of Primary Health Care</li> </ul>
	<ul> <li>Describe guidelines in PHC Planning</li> </ul>
1	8. Introduction to environmental health
	<ul> <li>Describe environmental health</li> </ul>
	<ul> <li>List common environmental problems</li> </ul>
	• Explain role of international agencies in environmental safety
,	9. Nuclear medicine
	<ul> <li>Describe the basic concepts involved in radiation process</li> </ul>
	<ul> <li>State the standard permeable dose of radiation</li> </ul>
	<ul> <li>Describe the method of protection from radiation</li> </ul>
	<ul> <li>Describe safe management of radioactive waste</li> </ul>
	10. Genomics
	<ul> <li>Differentiate between genetics and genomics</li> </ul>
	<ul> <li>List the chromosomal abnormalities</li> </ul>
	<ul> <li>Describe the steps in genetic counseling</li> </ul>
	<ul> <li>Explain genetic surveillance</li> </ul>
	11. Introduction to Demography
	Describe demography
	<ul> <li>Explain sources of demographic data</li> </ul>
	<ul> <li>Explain the importance of demographic data</li> </ul>
	<ul> <li>Discuss the stages of demographic transition</li> </ul>
	12. Vital Statistics
	Describe vital statistics.
	<ul> <li>Describe Vital statistics registration in developing countries.</li> </ul>
	<ul> <li>Discuss the situation of vital statistics in Pakistan</li> </ul>
	13. Morbidity & mortality determinants
	<ul> <li>Explain morbidity measures</li> </ul>
	<ul> <li>Describe mortality measures</li> </ul>

 JINNAH SINDH MEDICAL UNIVERSITY
14. Population pyramid & interpretation
Define Population pyramid
• Compare the advantages and disadvantages of population
pyramid
15. Introduction to infections & control of infections
<ul> <li>Define different terms related to infection</li> </ul>
• Discuss the incubation period, serial time period in control of
infection
<ul> <li>Differentiate between infectious and communicable diseases</li> </ul>
• Describe control measures for infectious &communicable
diseases
• Explain the role of immune-prophylaxis &screening in the control
of infection
16. Emerging & Re-emerging diseases
<ul> <li>Describe emerging &amp;re-emerging diseases</li> </ul>
<ul> <li>Enumerate factors contributing to emergence</li> </ul>
<ul> <li>Explain preventive measures for the emergence</li> </ul>
17. Disease screening & Surveillanc
<ul> <li>Describe Screening and its role in natural history of disease</li> </ul>
<ul> <li>Classify the types of screening</li> </ul>
<ul> <li>List criteria of a good screening test</li> </ul>
<ul> <li>Discuss the characteristics of a good screening test</li> </ul>
<ul> <li>Calculate screening measures</li> </ul>
18. Disease Surveillance
Describe surveillance
<ul> <li>Differentiate between surveillance and monitoring</li> </ul>
<ul> <li>Describe the factors affecting the value of data</li> </ul>
19. Health Education
Describe Health Education
<ul> <li>Explain the principles and stages of health education</li> </ul>

JINNAH SINDH MEDICAL UNIVERSITY	
	<ul> <li>Discuss health education in Pakistan</li> </ul>
	Discuss Health Information, Education and Communication (IEC)
	20. Waste Disposal
	<ul> <li>Differentiate between various terminologies of waste disposal</li> </ul>
	<ul> <li>Describe the various ways to collect and dispose human excreta</li> </ul>
	<ul> <li>Explain the water carriage system</li> </ul>
	<ul> <li>Differentiate between sludge and sullage</li> </ul>
	Discuss advantages of different types of Sewage Treatment
	Plants
	21. Biomedical Waste
	Describe Biomedical Waste
	<ul> <li>Explain various types of Biomedical Waste</li> </ul>
	<ul> <li>Describe color coding scheme for various types of waste.</li> </ul>
	22. Outbreak Investigation
	Define an outbreak
	<ul> <li>Identify key steps in outbreak investigation</li> </ul>
	<ul> <li>Discuss the ethical and legal considerations</li> </ul>
	• Discuss the process of evaluation of the effectiveness of
	interventions
	23. Millennium Development Goals & Sustainable Development
	Goals
	<ul> <li>List MDG's and health related goals, targets and indicators</li> </ul>
	<ul> <li>List SDG's and health related goals</li> </ul>
	<ul> <li>Describe Pakistan's performance in health related MDG's</li> </ul>
	<ul> <li>Discuss factors that lead to failure of achieving MDG's</li> </ul>
	24. Demographic Equations
	<ul> <li>Calculate Demographic Balancing equations</li> </ul>
	<ul> <li>Describe Population doubling time</li> </ul>

	Explain Population Momentum
	1.Introductory lecture
FORENSIC	Describe basics terms related to Forensic Medicine and
MEDICINE	Toxicology.
	Enumerate the branches of Forensic Sciences
	• Explain the importance and utility of Forensic Medicine and its
	branches, in medical, legal and ethical issues
	<ul> <li>Discuss the structure of Legal system and the powers of different</li> </ul>
	courts in Pakistan
	2. Legal Procedures - I
	<ul> <li>Define important legal terms such as Summons, warrant, perjury,</li> </ul>
	deposition, exhibit, offence,
	cognizable offence, non-cognizable offence, oath, conduct
	money, summons case, warrant case, bail, FIR
	<ul> <li>Explain medical evidence and its types (oral, documentary,</li> </ul>
	hearsay, circumstantial)
	• List the documents prepared by a medical man (Postmortem
	Reports, Medico Legal Reports, Certificates such as birth
	certificates, death certificates, sickness certificates, certificates of
	unsoundness of mind)
	Differentiate Dying declaration and Dying deposition
	3. Legal Procedures – II
	<ul> <li>Enumerate the types of witnesses</li> </ul>
	<ul> <li>Explain the procedure of examination in the court</li> </ul>
	• List the protocols for the conduct of Doctor in the witness box,
	during court attendance &; recording evidence and volunteering
	of a statement by the doctor in court of law
	Describe Professional secrecy and Privileged communication
	4. Legal Procedures – III

JINNAH SINDH MEDICAL UNIVERSITY	
<ul> <li>Explain the hierarchy of Criminal courts in Pakistan</li> </ul>	
Define Pakistan Penal Code and Criminal Procedure Co	de; its
execution and delivery	
<ul> <li>List the general presumptions of law and general exempt</li> </ul>	ions of
law	
5. Thanatology - I	
<ul> <li>Explain the scientific concepts regarding death</li> </ul>	
<ul> <li>Highlight the significance of Medico-legal aspects of brain</li> </ul>	death
<ul> <li>Enumerate Howard's criteria of death</li> </ul>	
<ul> <li>Define the terms cause, manner, mode and mechan</li> </ul>	ism of
death	
<ul> <li>Describe the medico-legal aspects of sudden &amp;unexp</li> </ul>	ected
deaths	
6. Thanatology - II	
<ul> <li>Explain immediate signs of death with special stress on som</li> </ul>	atic or
clinical death	
<ul> <li>Define Suspended animation</li> </ul>	
<ul> <li>Summarize postmortem changes in the eyes</li> </ul>	
• Describe early changes after death such as Algor Mortis (C	Cooling
of the body), physico-chemical	
changes in various body tissues and organs under v	various
environmental conditions, such as	
changes in muscular system after death	
7. Thanatology - III	
• Describe Postmortem Lividity (Livor mortis, Hyposto	asis or
Suggilation) and its significance	
<ul> <li>Enumerate the postmortem changes in the blood, CSF, V</li> </ul>	itreous
humor and Bone marrow	
8. Thanatology - IV	

JINNAH SINDH MEDICAL UNIVERSITY
• Explain late signs of death i.e. Putrefaction, its mechanism,
changes and gases of decomposition,
forensic entomology, adipocere formation and mummification
9. Thanatology - V
<ul> <li>Define presumption of death and presumption of survivor-ship</li> </ul>
• Explain the method of writing certificate of death according to
WHO
<ul> <li>Summarize the parameters of estimation of time since death</li> </ul>
10. Autopsy - I
<ul> <li>Define autopsy and its types</li> </ul>
<ul> <li>List its aims and objectives</li> </ul>
<ul> <li>Differentiate between Medico legal and pathological autopsy</li> </ul>
<ul> <li>Explain Autopsy protocols</li> </ul>
11. Autopsy - II
<ul> <li>Describe external examination, types of incisions, techniques of</li> </ul>
autopsy,
<ul> <li>Explain negative and obscure autopsy</li> </ul>
<ul> <li>Summarize internal examination of head</li> </ul>
12. Autopsy - III
Describe internal examination of thoracic and abdominal
cavities
• Explain dissection of respiratory tract, heart, abdominal viscera,
pelvic organs, and Spinal cord
13. Autopsy - IV
Describe method of preservation of viscera for chemical and
histo-pathological examination
<ul> <li>List the preservatives used in mortuary</li> </ul>
<ul> <li>Define Exhumation and Postmortem artifacts</li> </ul>
14. Traumatology - I
<ul> <li>Define Injury, Hurt, Wound, Assault and Battery</li> </ul>

	JINNAH SINDH MEDICAL UNIVERSITY
	assify Injuries
• De	scribe blunt weapon injuries; Abrasions and Bruises
15. Trai	umatology – II
• Exp	plain the types, mechanism of production and medico legal
signi	ficance of Lacerated wounds
• De	escribe Sharp weapon injuries- Incised wounds, stab wounds
with	medico legal significance
16. Trai	umatology – III
• Su	mmarize Qisas and Diyat Act with interpretation of injuries
acco	ordingly
17. Cu:	stodial deaths and torture
• Eni	umerate deaths in custody
• D	efine Torture according to World Medical Association
(Dec	claration of Tokyo)
• Exp	plain various torture techniques
• List	the sequelae of torture
• De	escribe the role of Medical practitioner and the ethical issues
with	relation to torture
18. Infc	anticide (Pediatric Forensic Medicine- I)
• De	fine infanticide, feticide, still born baby and dead born baby
• Dis	cuss Maceration
• List	the methods of foetal age estimation
• Sur	mmarize the signs of live birth
• De	fine Precipitate labor/Unconscious delivery
• List	the criminal causes of death of new born babies i.e. Acts of
com	mission and omission
• Exc	plain autopsy on bodies of new born babies
	tered Baby (Pediatric Forensic Medicine-II)
	plain Battered Baby Syndrome, its etiology and clinical features
	umerate the Injuries related to Shaken Baby Syndrome with

JINNAH SINDH MEDICAL UNIVERSITY
mechanism
<ul> <li>Define Cot deaths (Sudden Infant Death Syndrome) and various</li> </ul>
possibilities of death with postmortem findings, Medico legal
importance of SIDS
20. Animal Poisons- Toxicology (Snakes and Scorpions)
<ul> <li>Classify snakes</li> </ul>
<ul> <li>Differentiate between poisonous and non-poisonous snakes</li> </ul>
<ul> <li>Differentiate between Colubridae and Viperidae</li> </ul>
<ul> <li>Summarize the signs and symptoms of bites by cobra and viper</li> </ul>
<ul> <li>Explain the principles of treatment of snake bite and Anti-venom</li> </ul>
therapy
<ul> <li>List the medico legal aspects of snakebite</li> </ul>
<ul> <li>Discuss the signs, symptoms and treatment of Scorpion bite</li> </ul>
21. Thermal Injuries (Burns, scalds)
<ul> <li>Classify thermal injuries and burns</li> </ul>
<ul> <li>Differentiate the types of burns</li> </ul>
<ul> <li>Calculate the surface area of burns in adults and children</li> </ul>
<ul> <li>List the causes of death, postmortem findings and artifacts due</li> </ul>
to burns
<ul> <li>Differentiate ante-mortem and postmortem burning</li> </ul>
<ul> <li>Differentiate burns due to dry heat, moist heat and chemicals for</li> </ul>
medico legal purposes
22. Environmental (Cold/heat) trauma
• Describe the causes, clinical features and treatment of injuries
due to local exposure to cold;
Frostbite, trench foot, and chilblain
• Explain Hypothermia; its causes, clinical features and treatment
• Discuss the injuries due to general exposure to heat viz.
Heatstroke, exhaustion, cramps; their
causes, clinical features and treatment

	JINNAH SINDH MEDICAL UNIVERSITY
	23. Forensic Electrocution & Starvation
	• Explain the features of injuries due to various types of electrical
	current
	<ul> <li>List the causes of death due to electrocution</li> </ul>
	<ul> <li>Enumerate lightning injuries and lightning deaths</li> </ul>
	<ul> <li>Describe the types, signs and symptoms and postmortem findings</li> </ul>
	of starvation
PATHOLOGY	SECTION I: GENERAL PATHOLOGY
&	TOPIC 1: CELLULAR RESPONSES TO STRESS AND TOXIC INSULTS
MICROBIOLOGY	ADAPTATION, INJURY, AND DEATH
	1. Introduction to Pathology Overview: Cellular Responses to Stress
	and Adaptation of cellular growth
	<ul> <li>Define Pathology and Pathogenesis</li> </ul>
	<ul> <li>Briefly discuss cellular responses to the injury and stages of</li> </ul>
	the cellular response to stress and injurious stimuli
	<ul> <li>Define adaptation, hypertrophy, hyperplasia, atrophy, and</li> </ul>
	metaplasia
	<ul> <li>Describe the causes and mechanism of hypertrophy,</li> </ul>
	hyperplasia, atrophy, and metaplasia
	2. Overview of Cell Injury and Cell Death
	List causes of cell injury
	<ul> <li>Briefly discuss various types of cell injury</li> </ul>
	<ul> <li>Discuss morphological alterations in cell injury including both</li> </ul>
	reversible and irreversible injury
	3. Necrosis
	Define necrosis
	<ul> <li>Discuss the pathological and morphological types of necrosis</li> </ul>

	JINNAH SINDH MEDICAL UNIVERSITY
4. Me	chanism of Cell Injury I
	<ul> <li>Describe mechanisms of cell injury (with examples) including</li> </ul>
	depletion of ATP, mitochondrial damage, influx of calcium,
	accumulation of oxygen derived free radicals, defects in
	membrane permeability, damage to DNA and proteins
	<ul> <li>Discuss properties of the principal free radicals involved in</li> </ul>
	cell injury.
5. Me	chanism of Cell Injury and examples (II)
•	Discuss ischemia and reperfusion injury
•	Discuss chemical and toxic injury
6. Ap	optosis
	<ul> <li>Discuss causes, morphological and biochemical</li> </ul>
	changes, and clinic-pathologic correlations in Apoptosis.
	Briefly describe the mitochondrial and extrinsic the
	pathways of apoptosis
	Briefly discuss Necroptosis
7. Intr	acellular Accumulations
	<ul> <li>Summarize the pathways of abnormal accumulation</li> </ul>
	<ul> <li>Discuss types of pigments (exogenous and endogenous)</li> </ul>
	<ul> <li>Describe hyaline changes, lipid, protein, and glycogen</li> </ul>
	accumulation
	<ul> <li>Discuss briefly pathological classification of intracellular</li> </ul>
	accumulations
TOPIC	2: INFLAMMATION AND REPAIR
8. Intr	oduction to Inflammation & Acute inflammation
	Define inflammation
	Classify inflammation

JINNAH SINDH MEDICAL UNIVERSITY
<ul> <li>List the causes of inflammation</li> </ul>
<ul> <li>Discuss the sequence of events in acute inflammatory</li> </ul>
process
9. Mediators of acute inflammation
<ul> <li>Name the main inflammatory mediators</li> </ul>
<ul> <li>Describe their role in the inflammatory process</li> </ul>
10. Morphological pattern & outcomes of acute inflammation &
Chronic Inflammation
Define chronic inflammation
Explain different morphological pattern of acute
inflammation
<ul> <li>List the outcomes of acute inflammation</li> </ul>
<ul> <li>List the causes and morphological features of chronic</li> </ul>
inflammation
<ul> <li>Describe the cells and mediators &amp; their role in chronic</li> </ul>
inflammation
<ul> <li>Describe the systemic effects of acute and chronic</li> </ul>
inflammation
11. Granulomatous Inflammation
<ul> <li>Define granulomatous inflammation</li> </ul>
<ul> <li>Discuss the pathogenesis of granulomatous inflammation</li> </ul>
<ul> <li>List the diseases with granulomatous inflammation</li> </ul>
<ul> <li>Discuss morphology of granulomatous inflammation</li> </ul>
12. Tissue repair
• Define tissue repair
<ul> <li>Describe the mechanism involved in tissue regeneration and</li> </ul>
scar formation
<ul> <li>List the factors that influence tissue repair</li> </ul>
13. Healing by First & Second Intention

JINNAH SINDH MEDICAL UNIVERSITY
<ul> <li>Contrast repair by primary and secondary intention</li> </ul>
<ul> <li>Describe the complications in tissue repair</li> </ul>
TOPIC 3: HEMODYNAMICS AND SHOCK
14. Edema, Effusion, Hyperemia and Congestion
<ul> <li>Define edema, effusion, exudate, transudate, hyperemia</li> </ul>
and congestion
<ul> <li>Define various terminologies according to morphology of</li> </ul>
edema & effusion
<ul> <li>Discuss the pathophysiologic categories of edema</li> </ul>
• Describe the mechanism & clinical significance of edema at
different sites
<ul> <li>Describe the morphological changes in chronic passive</li> </ul>
congestion of the lungs & liver
15. Hemostasis
<ul> <li>Define hemostasis</li> </ul>
<ul> <li>Describe the sequence of events involved in primary</li> </ul>
&secondary hemostasis including the role of
platelets, endothelium & coagulation cascade
<ul> <li>Describe the defects of primary &amp; secondary hemostasis</li> </ul>
Briefly discuss hemorrhagic disorders
16. Thrombosis & Embolism
<ul> <li>Define embolus, infarction &amp; thrombosis</li> </ul>
<ul> <li>Discuss various types of thrombi according to their</li> </ul>
morphology
<ul> <li>Describe the factors that predispose to thrombosis</li> </ul>
<ul> <li>Describe the morphologic features of thrombi</li> </ul>
<ul> <li>List the possible fate of thrombus</li> </ul>
<ul> <li>Describe the clinical features of venous, arterial &amp;cardiac</li> </ul>
thrombosis

JINNAH SINDH MEDICAL UNIVERSITY
<ul> <li>Define Disseminated Intravascular Coagulation (DIC)</li> </ul>
<ul> <li>Describe the pathogenesis of DIC</li> </ul>
17. Embolism & Infarction
Define embolism
<ul> <li>List the types of embolism</li> </ul>
<ul> <li>Describe the clinical manifestations &amp;consequences of</li> </ul>
pulmonary & systemic thromboembolism
<ul> <li>Discuss the clinical conditions that give rise to fat &amp;marrow</li> </ul>
embolism, air embolism & amniotic fluid embolism
Classify infarction
<ul> <li>Describe the morphologic features of red &amp; white infarct</li> </ul>
<ul> <li>List the factors that influence development of infarct</li> </ul>
18. Shock
Define shock
<ul> <li>List the three major types of shock</li> </ul>
<ul> <li>Describe the mechanism of three major types of shock</li> </ul>
<ul> <li>Discuss the factors involved in the pathophysiology of septic</li> </ul>
shock
<ul> <li>Describe the three stages of shock</li> </ul>
<ul> <li>List the clinical features of shock</li> </ul>
TOPIC 4: GENETIC DISORDERS
19 Introduction to Mendelian Disorders
<ul> <li>Discuss the transmission pattern of single gene disorder</li> </ul>
<ul> <li>Discuss the pathogenesis of important autosomal recessive,</li> </ul>
autosomal dominant, and X-linked disorders
<ul> <li>List the examples of Autosomal Dominant Disorders,</li> </ul>
Autosomal Recessive Disorders
20 Mutation

<ul> <li>Define ı</li> </ul>	mutation
------------------------------	----------

- Briefly discuss principles relating to the effects of gene mutation
- Distinguish between types of mutations in the coding and non-coding regions of genes

## 21 Single Gene Disorders I

- Define single-gene disorders
- Classify single-gene disorders on the molecular and biochemical basis
- Discuss disorders associated with defects in structural proteins (Marfans syndrome)

#### 22. Single Gene Disorders II

- Discuss disorders associated with defects in structural proteins (Ehlers-Danlos syndrome)
- Discuss disorders associated with defects in receptor proteins (Familial Hypercholesterolemia)
- Enumerate the types of lysosomal &glycogen storage diseases with their deficient enzymes

#### 23. Chromosomal Disorders

- Define normal karyotype and common cytogenetic terminology
- Discuss structural chromosomal abnormalities
- Discuss cytogenetic disorders involving autosomes including
   Trisomy 21: Down Syndrome, Trisomy 18: Edwards Syndrome,
   Trisomy 13: Patau Syndrome
- Name diseases with deletion of genes at chromosomal locus
- 22q11.2 (Di George syndrome, Velocardiofacial syndrome)
- Discuss cytogenetic disorders involving sex chromosomes

JINNAH SINDH MEDICAL UNIVERSITY
including Klinefelter syndrome, Turner syndrome
TOPIC 5: NEOPLASIA
24 Introduction to Neoplasia
Define neoplasia
<ul> <li>Discuss the nomenclature of benign and malignant tumors</li> </ul>
with respect to tissues of origin
<ul> <li>Describe characteristic features of benign &amp; malignant</li> </ul>
tumors
25 Gross & Microscopy of Benign & Malignant tumors
<ul> <li>Define Anaplasia, Metaplasia, Dysplasia, Metastasis</li> </ul>
<ul> <li>Define cell differentiation and de-differentiation</li> </ul>
<ul> <li>Discuss all the components and morphological features of</li> </ul>
anaplasia
<ul> <li>Discuss local invasion of tumors</li> </ul>
<ul> <li>Discuss pathways of spread of malignant tumors</li> </ul>
<ul> <li>Compare features of benign and malignant tumors</li> </ul>
26 Epidemiology of Cancer
<ul> <li>Discuss the global impact of cancer</li> </ul>
<ul> <li>List the environmental factors involved in the pathogenesis of</li> </ul>
malignancy
<ul> <li>Discuss different types of occupational cancers</li> </ul>
<ul> <li>Define acquired predisposing conditions leading to cancer</li> </ul>
development.
<ul> <li>Discuss association between chronic inflammatory states</li> </ul>
and cancer
<ul> <li>Discuss the role of genetic predisposition and interactions</li> </ul>
between environmental and inherited factors in cancer
development
27 Molecular Basis of cancer I
<ul> <li>List four classes of normal regulatory genes with respect to</li> </ul>

JINNAH SINDH MEDICAL UNIVERSITY
neoplasia
<ul> <li>Discuss stepwise accumulation of driver and passenger</li> </ul>
mutations
<ul> <li>Describe cellular and molecular hallmarks of cancer</li> </ul>
<ul> <li>Define oncogenes, Proto-oncogenes, and Oncoproteins</li> </ul>
<ul> <li>Classify oncogenes according to their mode of action and</li> </ul>
associated tumors
28 Molecular Basis of cancer II
Define Tumor Suppressor Genes
<ul> <li>Classify tumor suppressor genes according to their mode of</li> </ul>
action and associated tumors
<ul> <li>Discuss RB gene with respect to its role in tumor development</li> </ul>
<ul> <li>Discuss p53 gene with respect to its role in tumor</li> </ul>
development
29 Molecular Basis of cancer III
<ul> <li>Define the Warburg Effect and angiogenesis</li> </ul>
<ul> <li>Define evasion of programmed cell death (Apoptosis)</li> </ul>
<ul> <li>Discuss the stem cell–like properties of cancer cells</li> </ul>
<ul> <li>Discuss the effect of angiogenesis on tumor progression</li> </ul>
<ul> <li>Discuss local Invasion and distant metastasis in neoplastic</li> </ul>
lesions
<ul> <li>Explain the molecular basis of multistep-carcinogenesis</li> </ul>
30 Grading, staging & clinical effects of Neoplasia
<ul> <li>Define grading and staging of tumors &amp; cancer cachexia</li> </ul>
Classify paraneoplastic syndromes according to their clinical
effects and association with various tumors
<ul> <li>Discuss different types of laboratory investigations used for</li> </ul>
diagnosis of cancer
31 Tumor markers & carcinogenic agents
1

	JINNAH SINDH MEDICAL UNIVERSITY
	<ul> <li>Define chemical carcinogenesis, radiation carcinogenesis,</li> </ul>
	microbial carcinogenesis
	<ul> <li>Classify chemical and radiation carcinogens according to</li> </ul>
	their types and modes of action
	<ul> <li>Classify microbial carcinogenesis according to the viral and</li> </ul>
	bacterial involvement
	<ul> <li>Classify Tumor Markers according to types and mode of</li> </ul>
	action
SECT	ION II: GENERAL MICROBIOLOGY
32 In	troduction to Microbiology
	Define microbiology
	<ul> <li>Differentiate between prokaryotes and eukaryotes</li> </ul>
	<ul> <li>Discuss the types of microorganisms according to shapes</li> </ul>
	and staining
33 Bo	acterial structure I
	<ul> <li>Discuss the difference between gram-positive and gram-</li> </ul>
	negative bacteria
	<ul> <li>Discuss the essential components of bacterial structure</li> </ul>
	<ul> <li>Describe the different shapes &amp; staining procedure for</li> </ul>
	bacteria
34 Bo	acterial structure II and growth cycle
	<ul> <li>Describe the non-essential components of the bacterial</li> </ul>
	structure
	<ul> <li>Explain the growth cycle</li> </ul>
	<ul> <li>Differentiate between aerobic and anaerobic growth</li> </ul>
	<ul> <li>Describe obligate intracellular growth, fermentation of</li> </ul>
	sugars, iron metabolism
35 Bo	acterial genetics
	<ul> <li>Discuss mutations</li> </ul>
1	

JINNAH SINDH MEDICAL UNIVERSITY
<ul> <li>Describe the process of transfer of DNA within and between</li> </ul>
bacterial cells
<ul> <li>Discuss the importance of recombination</li> </ul>
36 Classification of Bacteria and Normal Human Microbiome
<ul> <li>Discuss the principles of classification of bacteria and normal</li> </ul>
human microbiome
Classify Bacteria
<ul> <li>Discuss the normal microbiota of various areas of the body</li> </ul>
37 Pathogenesis I
<ul> <li>Describe the principles of pathogenesis</li> </ul>
<ul> <li>List the types of bacterial infection</li> </ul>
<ul> <li>Explain the stages of bacterial pathogenesis</li> </ul>
<ul> <li>Discuss the determinants of bacterial pathogenesis</li> </ul>
(transmission, adherence, invasion)
38 Pathogenesis II
<ul> <li>Discuss the determinants of bacterial pathogenesis, (toxin</li> </ul>
production eg. exotoxin, endotoxin)
<ul> <li>Discuss bacterial infection associated with cancer</li> </ul>
<ul> <li>Describe the stages of infectious disease,</li> </ul>
<ul> <li>Describe the importance of Koch's postulates</li> </ul>
39 Host defence
<ul> <li>Discuss the principles of host defence, innate immunity (skin</li> </ul>
and mucous membrane)
<ul> <li>Describe the processes of inflammatory response,</li> </ul>
phagocytosis and adaptive specific immunity
40 Bacterial Vaccines
<ul> <li>Explain the principles of bacterial vaccines</li> </ul>
<ul> <li>Discuss bacterial vaccines use for active and passive</li> </ul>
immunity
41 Anti-microbial drugs and Resistance
1

JINNAH SINDH MEDICAL UNIVERSITY
<ul> <li>Discuss the principles of antimicrobial drugs stewardship</li> </ul>
<ul> <li>Briefly discuss the mechanism of action of various antibiotics</li> </ul>
and clinical indication of antibiotics against common bacterial
infections
<ul> <li>Discuss the concept of chemoprophylaxis and pro-biotics</li> </ul>
<ul> <li>Discuss the principles of antibiotic resistance</li> </ul>
<ul> <li>Discuss genetic and non-genetic basis of resistance</li> </ul>
<ul> <li>Discuss specific mechanisms of resistance</li> </ul>
42. Gram-positive cocci l
<ul> <li>Discuss the diseases and important properties of</li> </ul>
Staphylococci
<ul> <li>Describe the transmission, pathogenesis and clinical</li> </ul>
findings of Staphylococci
<ul> <li>Briefly discuss the treatment and prevention of</li> </ul>
Staphylococci
43. Gram positive cocci II
<ul> <li>Discuss the diseases and important properties of</li> </ul>
Streptococci
<ul> <li>Describe the transmission, pathogenesis and clinical</li> </ul>
findings of Streptococci
Briefly discuss the treatment and prevention of Streptococci
TOPIC: VIROLOGY
44 Basic Virology & Classification
<ul> <li>Compare viruses and cells</li> </ul>
Classify viruses
<ul> <li>Discuss symmetry, capsid and envelope of viruses</li> </ul>
<ul> <li>Discuss atypical virus like agents</li> </ul>
<ul> <li>Discuss viral vaccines and their types related to active,</li> </ul>
passive and herd immunity
45 Replication

	JINNAH SINDH MEDICAL UNIVERSITY     Describe viral growth curve
	Describe specific events during the growth cycle
	Discuss lysogeny and its relationship in bacteria to latency in
	human cells
46 Vi	ral Pathogenesis & host defence
	<ul> <li>Describe transmission and portal of entry of virus</li> </ul>
	<ul> <li>Differentiate pathogenesis and immunopathogenesis</li> </ul>
	<ul> <li>Differentiate nonspecific defences and specific defences</li> </ul>
TOPIC	C: MYCOLOGY
47 Bc	isic Mycology
	<ul> <li>Describe the structure and growth of fungi</li> </ul>
	• Explain the mechanism of pathogenesis in fungal infections
	<ul> <li>Describe fungal toxins and allergies</li> </ul>
	<ul> <li>Explain laboratory diagnoses and treatment of fungal</li> </ul>
	infections
ΤΟΡΙΟ	C: IMMUNOLOGY
	C: IMMUNOLOGY Troduction & Innate immunity
	roduction & Innate immunity
	roduction & Innate immunity Define immunity and its types and innate immunity
	Troduction & Innate immunity Define immunity and its types and innate immunity List the components of immune system
	Troduction & Innate immunity Define immunity and its types and innate immunity List the components of immune system Classify types of immunity according to their function
48 Ini • •	Troduction & Innate immunity Define immunity and its types and innate immunity List the components of immune system Classify types of immunity according to their function especially innate immunity
48 Ini • • •	Troduction & Innate immunity Define immunity and its types and innate immunity List the components of immune system Classify types of immunity according to their function especially innate immunity Discuss the functions of immune system
48 Ini • • •	Troduction & Innate immunity Define immunity and its types and innate immunity List the components of immune system Classify types of immunity according to their function especially innate immunity Discuss the functions of immune system Discuss the role of T cells, B cells, natural killer cells, macrophages in immunity
48 Ini • • •	Andrew StructureDefine immunity and its types and innate immunityList the components of immune systemClassify types of immunity according to their functionespecially innate immunityDiscuss the functions of immune systemDiscuss the role of T cells, B cells, natural killer cells,macrophages in immunityDiscuss the specificity of the immune response and properties
48 Ini • • •	Andrew StructureDefine immunity and its types and innate immunityList the components of immune systemClassify types of immunity according to their functionespecially innate immunityDiscuss the functions of immune systemDiscuss the role of T cells, B cells, natural killer cells,macrophages in immunityDiscuss the specificity of the immune response and propertiescomponent and pattern of recognition receptors
48 Ini • • •	Andrew StructureDefine immunity and its types and innate immunityList the components of immune systemClassify types of immunity according to their functionespecially innate immunityDiscuss the functions of immune systemDiscuss the role of T cells, B cells, natural killer cells,macrophages in immunityDiscuss the specificity of the immune response and properties

<ul> <li>Define adaptive immunity</li> </ul>
<ul> <li>Classify T cells according to its types.</li> </ul>
<ul> <li>Discuss the functions of CD4 and CD8 T cells with respect to</li> </ul>
activation, co-stimulation and
memory formation
<ul> <li>Discuss the effect of superantigens on T cells</li> </ul>
50 Adaptive immunity (II)
<ul> <li>Define adaptive immunity, antibody and primary response</li> </ul>
and secondary responses of antibodies
<ul> <li>Discuss the mode of activation of B cells</li> </ul>
<ul> <li>Discuss effector functions of B cells</li> </ul>
<ul> <li>Discuss the structure of antibody</li> </ul>
<ul> <li>Classify antibodies according to types</li> </ul>
<ul> <li>Discuss the functions of antibodies</li> </ul>
51 Major Histocompatibility Complex (MHC) & transplantation
<ul> <li>Define Major Histocompatibility Complex (MHC),</li> </ul>
transplantation & allograft rejection
<ul> <li>Classify MHC proteins according to its classes</li> </ul>
<ul> <li>Discuss the importance of MHC in transplantation</li> </ul>
<ul> <li>Classify types of transplant rejections</li> </ul>
<ul> <li>Discuss HLA typing in the lab in association with</li> </ul>
transplantation
52 Complement System
<ul> <li>Define complement system</li> </ul>
<ul> <li>Discuss complement system with respect to activation and</li> </ul>
regulation
<ul> <li>Discuss the role of complement in immunity</li> </ul>
<ul> <li>Explain the clinical aspects of complement system</li> </ul>
53 Hypersensitivity I & II
<ul> <li>Define Hypersensitivity reaction, desensitization, atopy, drug</li> </ul>

JINNAH SINDH MEDICAL UNIVERSITY
hypersensitivity
<ul> <li>Classify hypersensitivity according to its types</li> </ul>
<ul> <li>Discuss the pathogenesis of types I &amp;II hypersensitivity</li> </ul>
reactions
<ul> <li>Discuss various clinical presentations of type I &amp; II</li> </ul>
hypersensitivity reactions
<ul> <li>Discuss the treatment and prevention of types I &amp; II</li> </ul>
hypersensitivity
54 Hypersensitivity III & IV
<ul> <li>Define Arthus reaction, Serum Sickness, Immune Complex</li> </ul>
Disease
<ul> <li>Discuss the pathogenesis of type III &amp;IV hypersensitivity</li> </ul>
<ul> <li>Discuss various clinical presentations of type III &amp; IV</li> </ul>
hypersensitivity reactions
<ul> <li>Discuss the treatment and prevention of type III &amp; IV</li> </ul>
hypersensitivity
<ul> <li>Explain diagnostic immunology</li> </ul>
<ul> <li>Discuss briefly agglutination &amp; precipitations reactions, and</li> </ul>
ELISA
<ul> <li>Describe ABO blood groups, transfusion reactions &amp; Rh-</li> </ul>
incompatibility
55 Tolerance and Autoimmune Disease
<ul> <li>Define T &amp; B cell tolerance, and autoimmunity</li> </ul>
<ul> <li>Discuss the pathogenesis of autoimmune disease</li> </ul>
<ul> <li>Discuss various clinical presentations of autoimmune diseases</li> </ul>
56 Immunodeficiency
Define immunodeficiency
<ul> <li>Classify immunodeficiency according to its types</li> <li>Discuss various clinical presentations of immunodeficiency</li> </ul>

	diseases
PHARMACOLOGY	1.Introduction to Pharmacology
	<ul> <li>Discuss various branches of pharmacology and therapeutics</li> </ul>
	and their applications
	<ul> <li>Discuss various terminologies used in pharmacology and</li> </ul>
	pharmacokinetics and dynamics
	2. Routes of drugs administration
	<ul> <li>Classify various routes of drug administration</li> </ul>
	<ul> <li>Explain the advantages and disadvantages of different</li> </ul>
	routes of drug administration
	3. Sources of drugs and their active principles
	<ul> <li>Discuss various sources of drugs and explain their active</li> </ul>
	principles
	<ul> <li>Explain different types of drug doses and their effects</li> </ul>
	4. Drug Absorption and Bioavailability
	<ul> <li>Discuss various processes of drug permeation through</li> </ul>
	biological membranes
	<ul> <li>Explain drug absorption and bioavailability and factors</li> </ul>
	affecting them
	5. Drug Distribution, Volume of Distribution (Vd) and Drug Clearance
	<ul> <li>Describe drug distribution and Vd and discuss factors</li> </ul>
	affecting it
	<ul> <li>Discuss plasma protein binding of drugs and its influence on</li> </ul>
	drug distribution
	6. Biotransformation of drugs I and II
	<ul> <li>Describe principles of drug biotransformation &amp; metabolic</li> </ul>
	reactions (Phase-I and Phase-II)
	<ul> <li>Describe microsomal mixed function oxidase system and</li> </ul>
	concept of enzyme induction and
	inhibition

Explain various factors which could affect the process of drug biotransformation	
drug biotrapsformation	
7. Excretion of drugs, Steady State Concentration (Css) and Kinetic	5
of Drug Elimination	
Describe drug excretion	
<ul> <li>List various routes of drug excretion and factors affecting it</li> </ul>	
<ul> <li>Discuss drug clearance and elimination and explain their</li> </ul>	
kinetics	
<ul> <li>Explain Css and its clinical application</li> </ul>	
<ul> <li>Define half-life, its calculation and its relationship with drug</li> </ul>	
dosing	
8. Drug Receptors and mechanisms of drug actions (1 & 11)	
<ul> <li>Explain types of drug receptors, their properties</li> </ul>	
<ul> <li>Discuss various molecular mechanisms by which therapeut</li> </ul>	С
effect of the drugs are obtained	
9. Dose Response relationship and factors modify it.	
<ul> <li>Discuss the relationship between drug dosage and its clinic</li> </ul>	al
response with the help of graphical	
representation	
<ul> <li>Describe drug potency, efficacy, therapeutic index and</li> </ul>	
quantal dose-effect curve	
10. Adverse Drug Reactions	
<ul> <li>Discuss drug side effects, toxic effects and their types with</li> </ul>	
examples	
11. Drug-Drug Interactions	
<ul> <li>Explain types of drug interactions</li> </ul>	
<ul> <li>Discuss the pharmacokinetic and pharmacodynamics druce</li> </ul>	9
interactions	
<ul> <li>Describe potentiation, synergism, summation, additive</li> </ul>	
effects and drug antagonism with examples	

-

	1	JINNAH SINDH MEDICAL UNIVERSITY uses, adverse effects and contraindications of adrenergic
		antagonists
TUTORIALS	1.	Demographic Equations
COMMUNITY		<ul> <li>Apply the demographic balancing equation to estimate</li> </ul>
MEDICINE		population changes using data on births, deaths,
		immigration, and emigration.
		<ul> <li>Calculate population doubling time using the Rule of 70</li> </ul>
		and growth rate.
		<ul> <li>Explain the concept of population momentum and its</li> </ul>
		causes.
	2.	Measures of morbidity and mortality
		Calculate incidence and prevalence rates using given
		population data
		<ul> <li>Define mortality and describe key measures such as</li> </ul>
		crude death rate, age-specific death rate, and infant
		mortality rate.
	3.	Screening
		<ul> <li>Calculate sensitivity, specificity, positive predictive value</li> </ul>
		(PPV), and negative predictive value (NPV) using 2x2
		contingency tables.
		<ul> <li>Interpret calculated screening measures to assess the</li> </ul>
		performance of a screening test.
FORENSIC	1.Gene	eral Toxicology
MEDICINE		Define Toxicology
		<ul> <li>Classify poisons based on chief symptoms and medico legal</li> </ul>
		criteria
		<ul> <li>Explain the International toxicity rating of poisons</li> </ul>
	2. Gen	eral Toxicology
		• Define a poison
		<ul> <li>Differentiate between poison and a medicine</li> </ul>
	1	

	JINNAH SINDH MEDICAL UNIVERSITY
	<ul> <li>Explain routes of administration and excretion of poisons</li> </ul>
	<ul> <li>List the factors that modify action of poisons</li> </ul>
	<ul> <li>Explain the diagnosis of poisoning in living &amp; dead</li> </ul>
	3. General Toxicology
	<ul> <li>Discuss the duties of a doctor in a case of suspected</li> </ul>
	poisoning
	<ul> <li>List the general principles of treatment of poisoning viz.</li> </ul>
	Gastric lavage, Antidote therapy
	4. General Toxicology
	• Discuss the role of poisoning Information Centre in treatment
	of cases of poisoning
	5. Postmortem report writing/ Autopsy Protocols
	<ul> <li>Write a Postmortem Report according to WHO guidelines</li> </ul>
	6. Autopsy hazards
	<ul> <li>Discuss the hazards related to autopsy, and the methods to</li> </ul>
	prevent these hazards
	7. Traumatology
	<ul> <li>Write medico legal report of an injured person</li> </ul>
	8. Crime scene investigation
	Discuss the important aspects of crime scene investigation,
	Trace evidence and Locard's principle of exchange
PATHOLOGY	1.Cell Adaptations, Apoptosis and Necrosis
	<ul> <li>Discuss the morphological features of hypertrophy,</li> </ul>
	hyperplasia, atrophy, metaplasia
	Tabulate the differences between necrosis and apoptosis
	<ul> <li>Identify morphologic changes in cell injury culminating in</li> </ul>
	necrosis and apoptosis
	Discuss morphologically distinct patterns of necrosis including
	coagulative necrosis, liquefactive necrosis, gangrenous
	necrosis, caseous necrosis, fat necrosis, and fibrinoid necrosis

	JINNAH SINDH MEDICAL UNIVERSITY
	2. Inflammation
	<ul> <li>Discuss the morphological aspects of various types of acute,</li> </ul>
	chronic and granulomatous inflammation
	3. Neoplasia
	Discuss the classification of neoplasia
	• Discuss the morphological aspects of different types of benign
	and malignant tumors.
	4. Molecular diagnostic techniques
	List the indications for analysis of Inherited and acquired
	genetic alterations
	Summarise the basic principles of recombinant genetic
	techniques (PCR, FISH, RFLP, (BLOTTING) and their applications
	in the detection of genetic diseases
PHARMACOLOGY	1.Terms & abbreviations used in Pharmacology
	Explain the use of metric and apothecary systems of
	measurement in drug preparation
	Discuss various terms & abbreviations and their uses in rationale
	prescription writing.
	2. Dosage forms of drugs
	Discuss the classification, clinical usage and properties of
	different drug dosage forms.
	3. Routes of drug administration, sources and active principles of
	drugs
	• Explain various routes of drug administration, sources of drugs
	and active principles of drugs.
	4. Standard format of prescription writing
	Discuss the importance and standard format of prescription
	writing
	5. Absorption, Bioavailability, Distribution and Biotransformation of
	Drug

	Explain the process of drug absorption, bioavailability, drug
	distribution and biotransformation and factors that could
	modify them
	6. Drug dosage calculations
	<ul> <li>Explain the various formulae used to calculate the drug</li> </ul>
	dosages
	<ul> <li>Calculate the drug dosage for patients having varying ages</li> </ul>
	and body weights
	7. Drug receptors and mode of action of drugs
	<ul> <li>Explain drug receptors and mechanisms of action of drugs</li> </ul>
	8. Concepts of Autonomic Nervous System (ANS) & autonomic
	receptors
	<ul> <li>Explain the general concept of ANS and autonomic receptors.</li> </ul>
	9. Parasympathomimetic and Parasympatholytic drugs
	Discuss the classification, pharmacokinetics
	&pharmacodynamics of parasympathomimetic and
	parasympatholytic drugs
	10. Sympathomimetic and sympatholytic drugs
	Discuss the classification, pharmacokinetics, and
	pharmacodynamics of sympathomimetic and sympatholytic
	drugs
PRACTICALS	1.Microscope and staining techniques with its types
MICROBIOLOGY	<ul> <li>Identify different parts of microscope</li> </ul>
	Use of microscope in identification of histopathological
	specimens and micro-organisms
	<ul> <li>Name different kinds of stains and staining techniques</li> </ul>
	<ul> <li>Simple staining and its procedure</li> </ul>
	Gram Staining and its procedure
	2. Culture Media, Biochemical tests related to Gram positive
	organisms
	organisms

# JINNAH SINDH MEDICAL UNIVERSITY Name the various culture media required for bacterial • identification • Discuss the properties, characteristics and relevance of various culture media List biochemical tests related to Gram positive organisms Describe the principle and procedure of catalase and coagulase tests 3. Bacterial structure, Pathogenesis and Antimicrobial susceptibility testing Briefly discuss the bacterial structure Briefly discuss the bacterial pathogenesis Discribe the procedure of Antimicrobial susceptibility testing 4. Sterilization & Disinfection Identify the apparatus for sterilization & disinfection • Discuss the uses of various disinfectants PHARMACOLOGY 1. Preparation of Physiological Salt Solutions (Tyrode, Ringer, Kerb's and De-Jalon`s solution) Demonstrate the preparation of various physiological salt solutions listed above Describe their composition and experimental uses Explain the methods of calculation for solutions preparation of different strengths used experimentally 2. Preparation of ORS and 5% dextrose solution Prepare ORS and 5% dextrose solutions along with their composition Discuss their uses in clinical practice • Explain the methods of calculation for solution preparation of different strengths used clinically Calculate the deficit and replacement of fluids & electrolytes 3. Introduction to Power Lab System

	JINNAH SINDH MEDICAL UNIVERSITY
	<ul> <li>Identify various parts of Power Lab System</li> </ul>
	<ul> <li>Describe their functions in detail to perform relevant</li> </ul>
	experiments
	4. Effect of drugs on Rabbit's eye
	Demonstrate the effects of atropine, adrenaline, ephedrine
	and pilocarpine on rabbit's eye
	5. Effects of Drugs on the Frog's Rectus Abdominis Muscle
	<ul> <li>Demonstrate effects of drugs on isolated skeletal muscle</li> </ul>
	(Rectus Abdominis muscle of frog) by using Power Lab System
	Explain the effects of Acetylcholine, Carbachol, Methacholine
	acting as skeletal muscle relaxants
SKILLS LAB	I-Bleeding
	<ul> <li>Demonstrate the appropriate methods of managing external bleeding (Direct pressure, compressing pressure points elevation)</li> </ul>
	II- Soft Tissue Injuries
	<ul> <li>Demonstrate proper management of wounds including assessment, cleaning and dressing (head, forearm and hand, leg and ankle)</li> </ul>
	III- Vertebral Column Injury
	<ul> <li>Demonstrate correct rolls, moves and lifts in transporting a patient to avoid spinal cord injury (log roll, spine stabilization)</li> </ul>
	IV- Bony Injuries (Fractures)
	<ul> <li>Demonstrate the correct method of splinting fractures in the leg and arm</li> </ul>
	EQUIPMENT/MATERIAL NEEDED
	<ul> <li>FIRST AID KIT</li> <li>i. Bandages (crepe-2, 4 &amp; 6 inches, cotton, triangular)</li> <li>ii. Surgical sterile gauze &amp; sofra tulle</li> <li>iii. Safety pins (diff. sizes)</li> <li>iv. Scissor</li> </ul>

	JINNAN SINDI MEDICAL UNIVERSITI
INTERNAL	<ul> <li>Internal assessment will be according to JSMU policy. The</li> </ul>
ASSESSMENT	details of internal assessment will be determined by the
	respective institutions.
	<ul> <li>Internal assessment carries 20% weightage in the final, end-of-</li> </ul>
	year examination.
FINAL	MCQs and OSPE (observed and unobserved)
EXAMINATION	
MODULE	Course will be evaluated through a feedback form which will
EVALUATION	be posted on the JSMU website
